

## Manifest

We, the Europeans, are also challenged for the future of our united Europe: So get out of the armchairs, out of the spectator seats, out of the know-it-all attitude and into doing better. Into our own responsibility.

We are the owners of Europe. So let's behave like owners. Let's take care of it, let's increase its benefits, let's protect it from harm.

You can do so much, you do so much, you succeed in so much: make it a matter of fact to use all this - also - for Europe. Europe depends on the creativity, the - not only - cultural productivity, the commitment, the self-confidence and the ingenuity of its citizens. All this can only come from you. Only you can give all this to Europe. So do it!

"Bottom-Up", you citizens, you cities and regions of Europe! For too long we, who are after all the basis of Europe, have been on the defensive.
